## Death Came Without Warning

To Christian Maurer on Sunday Night at His Home After Retiring to Bed.

Having spent the day quietly in his home on Fifth street, and in usual good health and without a sign of impending death, Chris Maurer, well-known resident of the Pass for 30 years, succumbed to a heart attack shortly before 10 p.m. Sunday, Feb. 16, at the age of 60 years. He was a vigorous type of man, always in good humor and the last person people thought would have passed away so suddenly.

Previous to retiring, he had remarked on some of the ordinary incidents of the day to Mrs. Maurer, and referred to the anniversary of her father's death, which had occurred just a year ago. Shortly after, Mrs. Maurer noticed he was breathing heavily, and at first thought it was from the effects of a cold. She spoke to him, and receiving no answer, became alarmed, and despite efforts to get him to speak, he very quickly passed away without a word.

She called Mr. and Mrs. Adam McLintock, neighbors, and with their assistance attempted to revive him, at the same time summoning the doctors, but on their arrival they pronounced him dead.

Deceased, employed as pipefitter in McGillivray mine for the past eight years, was born in the Austrian Tyrol, and came to New York in his early twenties. For a time he lived in the western States, and first came to the Crows Nest Pass about 1901. He was married in Michel to Frances Fox, and besides his lan.

wife three sons survive; James, employed at McGillivray mine, and Leonard and Charles, at present living on their ranch at upper Elk Valley, and who were summoned home on their father's death.

For a time Mr. and Mrs. Maurer lived at Procter, B. C., and for ten years lived in Wallace, Idaho.

"CALL OF THE WILD"

Nick Omelusik's Home Destroyed  
Tough Work For Firemen

At 5.30 a.m. Monday the brigade turned out to a fire in West Coleman. A small house in which lived a married man and his wife and two children caught fire from an overheated stove, and was reduced to ruins in a very short time. It took some time for the alarm to be turned in to the fire hall, as instead of telephoning, the alarm was brought in by messenger, valuable time being lost. The firemen became encased in ice, and after turning the water off, before the hoses could be re-wound, they were frozen solidly throughout, taking several hours to thaw out.

People in nearby houses becoming alarmed, carried their children out in their night clothes to safer places. The brigade, however, prevented the fire from spreading to nearby homes, and deserve welcome credit for their difficulty work in temperature 45 below zero. Mrs. Joe Petruski's kindness in getting hot coffee for the firemen was appreciated.

## Statutory Meeting of Town Council

The first meeting of the new council for 1936 was held on Monday evening in the council chamber, Councillor Hayson presiding. The three councillors recently elected took the oath of office before James Ford, secretary.

The main business was appointing of committees for the year, as follows, the first-named in each committee to be chairman of same:

Finance-Borrows, Hayson, Al-

Works and Property-Plante, Antrobus, Allan.

Fire, Water and Light-Antrobus, Chapman, Hayson.

Health and Relief-Chapman, Hayson, License and Police-Hayson, Chapman, Plante.

By-Laws-Plante, Allan, Borrows.

Building-Allan, Borrows, Hayson.

Band and Park-Antrobus, Chapman, Hayson.

E. D. Battum, accountant, of Calgary, was re-appointed as auditor.

Deputy Mayor appointments for three months each during 1936 were appointed in the following order: F. Antrobus, W. Chapman, W. L. Borrows, W. H. Hayson. Mayor Pattinson is still at Victoria and is not expected home till the end of the month.

Mr. H. Davidson, president of International Co., arrived Thursday from Vancouver.

#### PALACE THEATRE NOTES

The big week-end feature will be "Rose of the Rancho," with John Boles and Gladys Swarthout in the leading roles, supported by Charles Bickford, Willie Howard, Herb Williams, Grace Bradley and H. W. Warner. It is a Paramount picture with gay caballeros, dark-eyed señoritas-singing, fighting — loving — beneath the western stars. It will be shown on Saturday and Monday.

The double feature on Tuesday and Wednesday will be "Night Alarm" with Bruce Cabot and Judith Allen and "Sing, Sing Nights," with Conway Tearle, Hardie Albright and Boots Malory.

Thursday and Friday will see "Here Comes Cookie," and Zane Grey's "Wanderer of the Waste Land," featuring Monte Blue.

## BUSINESS AS USUAL

## Fine Concert by Local Artists Under Miss Powell

Local Talent Heard to Advantage in Concert in Aid of St. Alban's Church

On Thursday and Friday evenings in St. Alban's Hall a very fine programme of songs, instrumental selections and sketches were thoroughly enjoyed by those who braved the cold weather. They felt fully repaid in the enjoyment they derived from the programme.

Particularly fine was the playing of the violin quartette, the players being John Pietraszko, Elizabeth Moore, Rudolph D'Amico and Freddy Blazenko. Their playing of LeMare's "Andantino" as one of a group of three selections was indeed fine, while others were also thoroughly appreciated.

Among the younger players, Donald Graham's piano-forte selection merits special praise for one young. Others who sang were Mrs. Walter Williams, Lorraine Rippon, Freddy Blazenko (who also gave two Russian dances), Miss Gwen Brown, whose fine soprano voice elicited hearty applause, and who was also heard in a duet with Mr. James Cousins, one of their selections being "None Shall Part Us From Each Other," from the Gilbert & Sullivan opera, "Iolanthe," followed by Victor Herbert's well-known song, "Ah, Sweet Mystery of Life." Mr. Cousins also sang "Love Was Meant to Make Us Glad."

Violin solos were played by Elizabeth Moore, Rudolph D'Amico and John Pietraszko. To give variety to a well-rounded programme, Foss Boulton recited Rudyard Kipling's famous poem, "Gunga Din"; Umie Johnson played a piano solo; Ellis Yates and Bill Holyk recited some personal experiences, an amusing little sketch, and Chopin's "Military Polonaise" was played as a piano-forte duet by Miss M. Powell and Miss Umie Johnson.

As a final number a short play entitled "A Warning to Those Who May be Hasty" was given by Bob Emmerson, Tom Goldring and William Antrobous.

Miss B. L. Dunlop as stage manager and prompter.

Thanks was expressed to Miss Powell and those assisting her for their good work on behalf of the church, and on Friday evening a bouquet was presented to her by the chairman as a token of appreciation by the vestry of the church.

## Exhibition Games For Seniors

Seniors Keeping Fit by Playing Alberta and B.C. Players

MacLeod Friday Night

Defeating Macleod Artics, Foot-hills League leaders, last Saturday night at Macleod, a return exhibition game is billed for Friday night here, which it is expected will draw a big house, as Macleod is one of the fastest teams Coleman has played against this season. The game was to have been played here last Monday, but was postponed owing to provincial play-off game between Macleod and Lethbridge.

#### Rossland Here Tuesday

Definite arrangements have been made to have the Rossland hockey team meet Canadians here Tuesday evening. Rossland are on tour and will also play against Macleod and Lethbridge.

#### Junior Championship Play-Off

Medicine Hat juniors and Cole man Tigers will battle to a finish in a sudden death game at the arena on Saturday night when they meet in the second round of the provincial play-offs. The Hat are said to be favored for the provincial title and with the local Tigers going in high gear a rousing game is assured. This is a game you should not miss.

## TERRIFYING EXPERIENCE

J. O. C. McDonald, pit boss in McGillivray mine, on his duties in the mine got his foot caught in the track on which mine cars are hauled to the surface. At the time several loaded cars were bearing down on him and he was unable to extricate his foot. He tried every way to squirm out of the path of cars, and concluded he might save one leg from being crushed. His shouts were drowned by the noise of the travelling cars, and the only thing he could do to warn whoever might be around was to wave his lamp.

Most fortunately this was noticed by Etienne Richards, who, realizing that something was amiss, immediately telephoned to the surface to tell the man in charge of the hoist to stop the haulage. The experience gave Mr. McDonald a severe shock, and he suffered some bruises from his efforts to get loose.

An attempt was made on Coleman Hardware Co. A pane of glass in the front door had been smashed, but as the lock could not be turned from the inside, attempts to pry the door with a bar had been made, indicated by marks on same.

Evidently the burglars were disturbed, for D. Gentile, living next door, states he and his wife were awakened by a cracking sound, which at first they imagined was caused by fire. He arose, and came out on the street to investigate. He found the glass in the hardware store broken. Not a soul was in sight. It is surmised that the burglars became alarmed when they saw the lights turned on in Gentile's place.

During the time a night policeman was on duty, no burglaries occurred. For some time there has been no protection against fire or burglary in the business section at night.

## What's Wrong With Radio?

What is wrong with the Canadian Radio Commission and its programs? There is abundant evidence that the governing body of radio broadcasting in this country is not filling the bill to the taste of Western Canadian radio fans. Discontent is heard on all hands when the subject is under discussion among users of radio in the three prairie provinces and press commentators, even those inclined to be more merciful to the authorities, are constantly poking the commission.

Dissatisfaction is not so rife in Eastern Canada, because, it is said, the residents of that half of the Dominion, who do not like C.R.C. commission programs coming over the air at the moment, can, with an easy twist of the wrist, turn to something more to their taste, and bring in a wide selection from the best Eastern stations on the other side of the international boundary without interference from local stations.

In Western Canada radio fans are largely precluded from this consolation due to the fact that the distribution of wave lengths in the west is such as to inevitably shut out reception from the more popular accessible stations on the American side of the line and particularly at those hours when radio is in most constant use, except for those few who are able to afford the most up-to-date models.

Unfortunately due to stringency resulting from a combined agricultural depression and world wide economic disaster of the past few years the great majority of citizens of the prairie provinces have been, and still are, forced to take their wireless entertainment from more or less antiquated receiving sets. Money is still too scarce to enable them to purchase the more modern sets, equipped with the latest refinements and they are unable, for the present at least, to tune in to stations on the other side of the line in close wave length to the local stations.

This is undoubtedly one of the causes of the prevailing dissatisfaction and is one which should be recognized and, if possible, rectified by the commission.

Another oft-heard complaint is that in the choice of its chain programs the Commission devotes too much time to highly classical music and too little to the type of entertainment which the greater majority of Western Canadians would sooner hear. In other words, it is stated that the programs are not well balanced. This great majority would prefer to hear a little more of the "jolly rollicking barn dance" type of music and more entertainment of a humorous variety than the Commission appears able or willing to provide, but at the same time they want this entertainment furnished by what may be termed "top notchers" and not by mediocre amateurs.

It is true, perhaps, that the Commission has dimly perceived its shortcomings in this respect and has made some effort more recently to cater to popular demand but in doing so has relented to a considerable extent on local talent of not very high rating, possibly due to a desire to placate local jealousies. In this connection it might be suggested that the commission might very well make more use of local commercial stations as an elimination school and select only those best qualified to appear on their chain programs with some provision for adequate remuneration.

It is generally conceded, too, that one of the factors responsible for the commission's seeming inability to cater to western requirements is the fact that too much of the revenue derived from radio license fees finds its way into the Dominion government's treasury and too little of it is allotted to the commission for its work. If the commission were allowed a greater proportion of this income it is possible that they might be able to find or develop sufficient talent to eliminate some of the criticisms to which it is exposed.

Then, too, the commission has been subjected to criticism from time to time for lack of initiative. A case in point is its decision not to make a Bell Telephone recording of the funeral services of the late King George for reproduction at an hour when the great majority of Western radio listeners could participate.

It is admitted that the problem is one which bristles with difficulties and that the commission has no easy task to perform if it should attempt to satisfy everybody, but one instinctively feels that it has not succeeded as yet in going as far in this direction as it might.

There is some talk just now of a new commission being set up consisting of only one paid member, the chairman, and an unsalaried advisory board. Whether such a change would result in a greater measure of satisfaction would depend largely on the personnel. The membership, if such a board is created, should certainly include one or more who are conversant with the western situation and it is essential that at least one or more of the members know something about showmanship as well as the technical side of radio.

### Trans-Atlantic Air Mail

#### Regular Service Between Britain And Canada To Come Soon

Regular trans-Atlantic air mail services by April or May of next year is considered likely by United States postal officials.

Harley Branch, second assistant postmaster-general, said: "Undoubtedly the first route would be from the United States to Great Britain, probably through Ireland to London."

He expressed the belief that the existing air line to China would be carrying passengers by early spring this year and reported a branch route from Honolulu to Australia and New Zealand was under consideration.

Fire, the first chemical agent of man, is believed by many authorities to have been in use at least 60,000 years.

### Was Once Fertile Plain

#### Explorer Proves Neolithic Man Lived in Sahara Desert

Fishing in the Sahara was once a favourite pastime of man. This discovery was made by Henri Lhote, a Frenchman, who unearthed the first skeletons of neolithic man found in Africa. These men lived 10,000 years ago, he said, when swift streams, now dried up, once ran through a fertile Sahara plain. The young explorer, who passed two years digging in prehistoric dunes in the southeastern part of the desert, analysed the bone structure of the old-time fisher, who belonged to the Negro race. Vertebrae of fresh water fish as well as harpoons made from bone, showed a dried-up river bed was nearby. This surprise was later proved correct.

### WAKE UP YOUR LIVER BILE—

#### And You'll Jump Out Bed in the Morning Rain! To Go

The liver should pour out two pounds of bile daily. If it does not, the bile is not flowing freely; your food doesn't digest. Just always eat the bowel. Get about six glasses of water a day. Then go to bed, and you feel sound and strong.

A mere bowel movement *always* gets at the cause. You need something good, old Carter's Little Liver Pill to get the bowels moving. It is a safe, natural product. It "sets" up and "up". Harnesses gentle, they never offend the stomach. They contain no calcium nor have no sodium or mercury in them. Ask for Carter's Little Liver Pill. It refutes anything else.

### The Real Issue

#### Can Any Nation Be Permitted To Break Treaties

The real issue between Italy and the League of Nations is not whether Abyssinia is uncivilized and blame-worthy or whether Italy has real grievances or not. The real issue, the real question, is can Italy or any nation be permitted to break its treaties and agreements and disregard all its obligations—can every nation be allowed whenever it has, or thinks it has, a grievance against another to be the sole judge in its own case and enforce its claims by invading another country and killing its people—it's men, women and children—by machine guns, explosive bombs from aeroplanes—and even by poisoned gas?

### Ship Without Rivets

#### River Barge Of Russian Shipping Line Electrically Welded

An oil-tanker river barge has been added to the Lower Volga Shipping Line is said to be a unique example of shipbuilding. No rivets whatsoever were used in its construction, the sections of the hull being welded electrically. The combined length of all the welded joints totals 40 miles. The vessel has a length of 450 feet, a beam of 62 feet, a middle height of 11 feet, and a carrying capacity of 6,000 tons. By employing the welding method, a considerable economy in metal was effected. The weight of the hull is 411 tons, 75 tons less than that of a riveted barge of the same tonnage.

### Invention Makes Book Talk

#### Device Gives Seven Hours Reading To Sightless Persons

By means of the invention of a blindfold World War veteran, a novel may tell its story to sightless persons, with scarcely an interruption, at one narration. The new device, called the "Libraphone," was perfected by T. O. Leefe, of Birmingham, England. The recording is on sound picture principles.<sup>a</sup> By a system of multi-track recording 20 sound tracks may be run to and fro along a 500-foot length of standard sized film, making 10,000 feet of recording possible in 500 feet. Projected at the customary rate of 22 feet a minute, it will insure the listeners of a reading of just over seven hours.

### Manufactured Feeds For Live Stock

According to a recent survey, ready mixed feeds for live stock and poultry to the extent of 198,000 tons with a value at the manufacturing point of \$7,725,177 were purchased by Canadian farmers in 1934. Poultry feeds led other items, followed by swine feeds with 16,252 tons and horse feeds with 4,228 tons. Sales of only 14 tons of sheep feeds were reported.

### Apples On The Prairie

Fifteen years of experimental work with new varieties of fruits by Dr. Steager Wheeler of Rosthern, have brought results in the way of hard strains. He has now a fair prospect of apples, plums and cherries suitable to the prairie.

### To Conserve Wild Life

#### Seven-Point Programme Presented To Washington Conference

A seven-point programme for wild life conservation was presented to the North American wild-life conference, at Washington, by Ira Gabrielson, chief of the bureau of biological survey.

Officials of the general wild-life federation, formed by the conference, said the Gabrielson programme would be used as a basis for its efforts to build up the game population.

The objectives were:

1. More land for the restoration and use of wild life.
2. Closer federal and state cooperation.
3. Recognition of wild life values in land planning.
4. Education of stream pollution.
5. More research into wild life problems.
6. Closer co-operation of federal and administrative agencies.
7. Better protective legislation.

T. R. L. MacInnes, of the Canadian department of Indian affairs, told what Canada was doing for the hunting Indians. He said 50 per cent or about 50,000 of the Canadian Indian population were dependent in whole or in part on hunting and fishing for a livelihood.

MacInnes said white trappers were encroaching on the hunting grounds in the northern part of the provinces formerly used only by Indians. He said hunting preserves had been set aside especially for Indians, and explained how the Indian problem of fishing and hunting had been handled by the various provinces.

### SELECTED RECIPES

#### MAGIC HERMITS

1/2 cup butter  
1 1/2 cups brown sugar  
2 eggs  
1 cup chopped raisins  
1 cup chopped walnuts  
1 cup chopped dates  
1 teaspoon vanilla  
1/2 cupnutmeg  
1/2 teaspoon cinnamon  
2 cups flour  
1/2 teaspoon Magic Baking Powder  
1/2 teaspoon Magic Soda  
2 tablespoons milk  
Water  
Mix and sift together the dry ingredients. Cream butter, add sugar and well-beaten eggs, and vanilla. Then add one-third of the flour mixture, fruit and nuts. Add more flour and liquid alternately until all are used up. Mix thoroughly. Drop by spoonfuls on a greased shallow pan and bake in moderate oven 15 to 20 minutes.

### Big Mining Development

#### Over 400 Claims Staked In Great Slave Lake Mining Area

Over 400 claims have been staked in the Yellowknife and nearby areas in the Great Slave Lake mining field, according to A. L. Cummings, of Fort Smith, district agent and chief mining engineer for the Dominion government, who was in Edmonton recently on his way to Ottawa.

"We will see one of the biggest developments in years in the Great Slave region," said Mr. Cummings. "Just as soon as spring opens, extensive work will be under way. Several large concerns are located there and will be going ahead with development just as soon as possible.

### Quite A Difference

The rector had invited the village boys to the rectory for a strawberry tea. After they had finished, he, seeking to point out the moral, said: "Now boys, wasn't that nicer than breaking into my garden and helping yourselves?" "Oh, yes," chorused the boys. "And why was it nice?" he asked a chubby-faced boy. "Because, sir," was the reply, "we had sugar and cream with them."

### Forestry Congress

#### Lumbermen Urge Nation-Wide Conference To Discuss All Phases Of Work

A "nation-wide" forestry conference to discuss all phases of forestry work and its relative industries was urged in a resolution passed at the closing session of the Canadian Lumbermen's Association annual convention at Montreal.

N. F. Blair, of Quebec, was elected president for 1936. A. Sparks, of Winnipeg, was named to the directorate for a three-year term. L. G. Carpenter, of Blind River, Ont., was elected for one year.

A Morgan horse resembles Arabian horses in having only five lumbar vertebrae, instead of six, which is one reason for believing that the Morgan horse has Arabian ancestry.

When men act behind a steering wheel the same as they do in a drawing room, there will be fewer motor accidents.

### Salt Highways

#### New Method May Solve The High Cost Of Building Roads

Common salt may solve the high cost of highways, an interview in Winnipeg, R. M. Bowat, of Windsor, Ontario, well-known Canadian research chemist, reports the successful production of test stretches of "salt highways" at more than 12 Ontario points. Over 200 miles of these roads have been built to date in the United States.

In his interview, Mr. Bowat emphasized the fact that the development was still in the experimental stage. The aim is to produce a hard, durable and dustless road surface, using cheap materials readily available locally in most sections of the Dominion. Highway engineers refer to it as a "salt-stabilized road" and the material because of its appearance and wearing qualities sometimes known as salt concrete. The ingredients of a salt highway are gravel or crushed stone, clay and common salt, the last named in comparatively small quantities. He mentioned a test stretch in Ontario where 15 tons of salt per mile was sufficient for a successful road surface three inches thick and 20 feet wide.

The important factor in a salt-stabilized road, Mr. Bowat indicated, were the coarse aggregates, (gravel or crushed stone) and the securing of proper proportions of the three ingredients. These proportions would be governed to a large degree by the quality and size of the gravel and would not vary from district to district but might easily change in different sections of any one road being treated. Generally speaking, specifications could be drawn up to provide for the use of coarse aggregates and clay available locally in a given locality. The proportions of the mixture and the method of application were established by careful laboratory tests of the materials in advance and during construction.

In Ontario, there are now test stretches of salt highways on a number of heavily travelled routes including provincial roads near Toronto and the highway route to Muskoka Lakes resort. Credit for the original discovery is given, in large measure, to a Canadian engineer, A. R. Chambers of New Glasgow, N.S. Seeking a solution to the dust nuisance, he remembered that the ceramic industry used salt with clay to improve its drying qualities, applied the same principle to a section of Nova Scotia road and produced the first stretch, on this continent at least, stabilized with salt.

# Find Third Instance Of Sabotage On British War Vessels

London.—The admiralty announced that sabotage had occurred aboard the 9,750-ton British cruiser Cumberland, anchored at Chatham.

"The matter is under investigation," the announcement said, "and it would not be in the public interest to make any statement."

The Cumberland was placed in the Chatham dockyard March 12, 1935.

It was understood the Cumberland had been undergoing some alterations.

This was the third instance of sabotage on British warships while in dockyards within three months.

The other vessels said to have been tampered with were the battleship Royal Oak and the submarine Oberon. Damage to these vessels was disclosed in December. It was stated damage to the Royal Oak amounted to several hundred pounds and that to the Oberon was minor.

Admiralty authorities and Scotland Yard detectives investigated the previous incidents but made no statements. The Royal Oak and the Oberon were at the Devonport yards.

## Oil Sanctions

**Would Be Effective If U.S. Would Limit Exports**

Geneva.—An oil sanction against Italy a committee of experts reported to the League of Nations, "would be effective" if the United States limits its exports to the warring nation to the normal level prior to 1933.

In its official report after weeks of deliberation, the committee expressed the opinion that if the embargo were universally applied under conditions prevailing now, it would become effective within about three or four and a half weeks.

But, the experts reported, if the sanction is imposed by league states alone the only effect it would have on Italy "would be to render the purchase of petroleum more difficult and expensive."

## Textile Inquiry

**No Date Yet Fixed For Hearings Before Commission**

Ottawa.—No date has been fixed for the opening hearings before the Turgeon commission appointed to investigate the textile industry, pending conclusion of court engagements now occupying J. C. McRae, of Toronto, chief commission counsel.

Justice W. F. A. Turgeon, of the Saskatchewan appeal court, appointed a one-man commission to conduct the investigation following the temporary closing of a rayon plant in Sherbrooke, Que., that has been in Ottawa for some time making preliminary arrangements for the inquiry.

## New Organization

Edmonton.—With object of promoting the welfare of the dairy breeding industry in the province, the Alberta Cattle Breeders' Association was organized at a gathering of some 30 dairy breeders here. T. H. Howes was named provisional chairman and six directors, representing breeders of the six types of cattle, were named.

## Receive Life Sentence

Aix-en-Provence, France.—The three men charged with the assassination of King Alexander, of Yugoslavia, and Louis Barthou, French foreign minister, were sentenced to life imprisonment here.

# Government Planning Public Works Program As A Relief Measure

Ottawa.—The government is working on an extensive public works program as an unemployment relief measure, it was learned. The main estimates brought down were intended to provide for the cost of government under normal conditions and extraordinary expenditures due to existing circumstances will be met in other ways.

Consideration will be given to proposals for public works which would directly or indirectly produce revenue. The government is not expected to agree to any considerable public works which would not produce

## Abolish Slavery System

**Conditions In Crown Colony Of Hongkong Not Satisfactory**

London.—J. H. Thomas, secretary for colonies, renewed in the House of Commons Britain's promise to abolish the Mui Tsai, or slavery system, in the crown colony of Hongkong.

Graham White, Labor, asked what the government intended to do about the unsatisfactory condition disclosed by the report of the committee of investigation.

Mr. Thomas said he intended to await recommendations from the administration of the crown colony before taking action.

"No one could read the report without dismay, and I have no hesitation in saying that definite promises were made very many years ago that we would try to abolish it. I will try to accomplish that," said Mr. Thomas.

The Mui Tsai system permits the purchase of Chinese children, male or female, for use as domestic slaves.

## To Investigate Dispute

**Soviet And Japanese Governments To Appoint Commission**

Moscow.—The Soviet and Japanese governments have agreed in principle to the appointment of a mixed commission to investigate clashes on the Soviet-Manchourian border, an official communiqué said.

The offer to the Japanese government to enter into such an arrangement was communicated to the foreign office by Japanese Ambassador Tamaki Ota. G. S. Stomniakov, Russian vice-commissar for foreign affairs, recalled that the Soviet government frequently made similar proposals in the past.

The Soviet government, Stomniakov said, "learns with satisfaction that the Japanese government, which until now has rejected all proposals by the Soviet government for an investigation of the border incidents in mixed commissions, now considers it possible to accept the offer suggested by the staff of the Soviet far eastern 'my Feb. 12.'

## Germany's Secret Police

**Decree Issued By Hitler Makes Force All-Powerful**

Berlin.—Chancellor Adolf Hitler's secret state police, was made all-powerful in the Reich by a decree issued ordering all administrative officials, from government heads down, to obey gestapo orders.

Emergency decree was believed concentrated by this decree in the hands of Air Minister Gen. Hermann Wilhelm Goering, who controls the gestapo.

The law orders district governors to take commands from secret police headquarters, which will, in return, supply the local police departments with such directions as may be desirable.

The effect of the decree is to ally the secret police more closely with Germany's civil administration.

## Refuses To Stand

Dublin.—A woman senator refused to stand in the Irish Free State senate during a minute's silence voted in sympathy for the royal family's loss by the death of King George V. The woman is the widow of Thomas Clarke who, with his brother Edward, was executed after the 1916 uprising.

Ames.—The type of works said to be favored are harbor improvements, road building which would encourage tourist traffic and perhaps assistance to the railways to enable them to increase their revenues and compete better with improved travel conditions on United States lines.

At the recent Dominion-provincial conference it was suggested the Dominion and provinces join not only in the trans-Canada highway but in roads designated as feeders to this highway. It is expected this proposal will be given particular study.

## O'Donnell Convicted

**Toronto Man Sentenced To Hang For Ravine Murder**

Toronto—Steel-nerved Harry O'Donnell heard a murder conviction with unshaken calm and then declared his innocence a few moments before being sentenced to hang May 5 for the ravine slaying of pretty Ruth Taylor.

The slim gasoline station attendant heard himself condemned to the gallows for the ravishing and killing of the 20-year-old stenographer. Serious-faced for an instant as he made his one-sentence plea of innocence, he was smiling almost gaily as he walked out on court with a jest on his lips.

His conviction will be appealed. Chief Defence Counsel Frank Pagan, K.C., veteran master of court craft, fought an 11-day court room battle to save the accused killer, announced at the trials close he would seek a reversal of the jury verdict.

The verdict came after the jury had deliberated an hour and 20 minutes.

Mr. Justice Jeffrey asked O'Donnell if he had anything to say before sentence was passed.

"Yes, my lord," said O'Donnell in clear tones that carried through the room, "I'm still not guilty."

## Inquiry Into Dismissals

**Premier Announces Probe In Connection With Speaker's Cagrin**

Ottawa.—An inquiry into the dismissal and employment of House of Commons help will be made by the committee on privileges. Prime Minister Mackenzie King announced in the house.

The inquiry will take place later in the session after the committee has been set up and a deputy speaker has been appointed.

Mr. King made his announcement after Conservative Leader Bennett charged a number of employees had been dismissed in breach of the privileges of the house.

Mr. Bennett agreed to the proposed investigation, providing Speaker Casgrain tabled all papers in connection with dismissals under his regime. Mr. King said Mr. Bennett would have to move for the papers in the regular way.

## Legion Pilgrimage

**3,000 Have Already Registered To Make Trip**

Ottawa.—Registrations of ex-service men and dependents for the Canadian Legion's pilgrimage to Vimy Ridge in July number 3,600, with the deadline one month away. Brig.-Gen. Alex Ross, Dominion president of the organization, said here.

Due to the problem of assigning vessels to the trans-Atlantic crossing no applications for inclusion in the pilgrimage will be considered after March 12, the date fixed following representations from companies concerned.

ROYAL SONS FOLLOW LATE KING'S CASKET

The new Sovereign of the British Empire is here seen between his two brothers, the Duke of York right, and the Duke of Gloucester, as they led the solemn procession of foreign royalty and representatives of the nations of the world at the funeral of King George V.

## CUT ELECTION COSTS

Mr. Harry Butcher, former M.P. for Last Mountain, Saskatchewan, who has been commissioned by the Dominion Government to investigate the problem of how to cut election costs to the advantage of the candidates and the Canadian Treasury.

Mr. Butcher will go to the Mother Country to study the system in operation there.

## Wide Publicity Campaign

**Canadian Travel Bureau Has Plan To Attract Tourists**

Port Arthur, Ont.—A concentrated publicity campaign broader in scope than any previously developed has been planned by the Canadian travel bureau to attract tourists to the Dominion during 1936. D. Leo Dolan, bureau director, told a meeting of the chamber of commerce.

"It is our plan," Mr. Dolan said, "to utilize some 30 national magazines and approximately 89 newspapers appearing in the United States from Boston to the Pacific Coast."

Under the new zoning system the campaign appeal to the tourists of New England will be based upon the attractions of Quebec and the maritime provinces while the appeal to residents of the central states will outline the attractive features of Ontario and Manitoba. Similar campaigns will be pressed in the western states with a view to attracting travelers to Saskatchewan, Alberta and British Columbia.

# Finance Minister Describes New Policy Of Money Votes

## Satisfied With Progress

**Great Britain Prepared For Any Attacks From Air**

London.—The admiralty is alert to the question of defence against modern aerial attack.

Viscount Monson, first lord of the admiralty, told the house of lords that in the last few years combined air and naval manoeuvres have been held on a large scale as defensive preparations against possible attack upon the British Isles.

The manoeuvres, he said, have revealed valuable information for new construction; both with regard to anti-aircraft guns and hull construction.

Regarding the problem of bombs versus battleships the first lord of the admiralty said that all countries shared the opinion that air attack had not rendered the battleship obsolete. No country was abolishing the battleship.

The immense offensive power of aircraft was not being underrated but Lord Monson warned against exaggeration of its value. The bomb was not really a new problem but imposed the necessity of having guns firing vertically as well as horizontally.

"We are more than satisfied with the progress we are making with our anti-aircraft guns," concluded Lord Monson.

## Race For Air Routes

**Competition For Control Of Trade Routes In The Air**

Washington.—Warning of an impending international race for control of trade routes of the air was issued by the national advisory committee for aeronautics in its annual report to President Roosevelt.

"The foundations are being laid now for a world-wide struggle for the control of trade routes of the air, and for the control of world aeronautical markets," the committee's report said.

"It is becoming generally recognized that, other things being equal, a decisive advantage in this struggle will be with that country that has the greatest vision and initiative in establishing research facilities and in executing long-range research programs."

## Appropriation Increased

Ottawa.—The government has increased by \$2,500 the amount appropriated for the book of remembrance which will stand on the altar in the memorial chamber of the parliament buildings here. The appropriation last session was \$5,500.

# C. C. F. Motion Meets With Defeat By Large Majority

Ottawa.—The King government emerged from its first test of strength in the House of Commons with a majority of 200, recruited from Liberals, Conservatives and Social Crediters.

By a vote of 208-8 the house turned down an amendment to the address in reply to the speech from the throne and then passed the main motion without division. The amendment, proposed by J. S. Woodsworth, C.C.F. leader, condemned the government for not presenting a legislative program designed to ameliorate distress conditions and distribute wealth among the people.

Each of the seven C.C.F. members voted for the Woodsworth amendment and they were joined by Agnes Macphail, who was re-elected to the house as a United Farmer of Ontario-Labor. Opposed to it were 17 Social Crediters, 31 Conservatives and 160 Liberals.

It has happened only half a dozen times in parliamentary history that an address motion has passed without division and it was believed the government's majority of 200 in turning back the amendment was one of the largest in circumstances of that kind.

Liberals withdrew from the debate most of the time being presented by C.C.F. and Social Credit speakers.

Charges that wheat exporters in Winnipeg rushed to the telephone to secure orders from Liverpool to take

Ottawa.—The House of Commons started a long weekend after passing \$1,758,400 in money votes, hearing about soldiers' shoes and being told the government had loaned British Columbia \$4,300,000.

The house, considering the main estimates, passed its money vote, including an item of \$155,000 to appropriate downtown property in Ottawa as a safeguard against possible erection of an ugly building that might spoil the plan for a Confederation square.

Members heard Finance Minister Dunning describe a new policy of money votes in which the main estimates will call for only-money needed for ordinary functions of government and supplementary estimates would be introduced to provide for such emergency requirements as relief, public works and railway deficits.

The emergency money legislation, the finance minister said, would take the place of order-in-council appropriations under the so-called "blank cheque" legislation of the last administration.

It was Mayor G. G. McGeer (Lib., Vancouver-Burrard), who raised the point of soldiers' boots. He joined other private members in protesting purchase of armories on the installation plan, a question raised by A. A. Heaps (C.C.F., Winnipeg North), who claimed the government, able to borrow money more cheaply than private sources, should pay for the buildings outright.

Mr. McGeer said Vancouver militiamen were unable to parade at full strength for the late King George's jubilee celebration last May because there were not boots for all of them.

The Vancouver mayor declared it was time the militia be ended if it could not be maintained by the government without private co-operation.

## No Revision This Year

**Dominion Electoral Lists To Remain As They Are**

Ottawa.—First government measures introduced by the new administration and given first reading on motion of Secretary of State Ferdinand Rinfret confirmed the report annual revision of the Dominion electoral lists would not be carried out this year as provided for in last year's Dominion Franchise Act.

A decrease of nearly \$600,000 was noted in the estimates for the Dominion franchises commissioner and chief electoral officer.

The measure introduced would amend the Dominion Franchise Act, postponing annual revision of the lists for one year.

THURSDAY, FEBRUARY 20, 1936

## NOTES AND COMMENTS

STOKING throughout the day to keep dwellings and offices at a temperature fit to work in, and chasing around during the night to see that the water connections do not freeze, such has been the hectic experience of most people for the past few weeks. Even grandfather cannot beat this for a winter, and if sun dogs are to be relied on as weather forecasters, then we haven't yet seen the finish of real winter. It was a great relief on Tuesday to enjoy temperature ten or more degrees above zero. Everyone felt comparatively warm and comfortable. It is hoped that the sun dogs were only playing a little joke, and that warmer weather is at hand.

BUT 40 and 50 below zero hasn't dampened the ardor of Social Creditors in Edmonton, where long speeches on what the government will do to abolish poverty in the midst of plenty furnish columns of copy for the government's mouthpieces in the shape of a daily newspaper of which Geo. M. Bell still has his name at the masthead as president and managing director.

WHEN YOU have a nice warm building to work in, such as the legislative buildings at Edmonton, it is conducive to talk. And there is the comforting thought that such talk carries with it \$1800 for every member, in fact you do not even have to talk to get it. But some are enjoying the time of their lives getting into the limelight, trying to get their names in the newspapers, even if they have to tell tales of woe sufficient to make a stone image weep. Economy in words as in other things is needed, and more deeds.

SOME YEARS AGO efforts were made to maintain interest in a local board of Trade. Monthly luncheons were tried to get men together for an hour or so, in order to exchange views and discuss measures which might be instituted for the general welfare of the town. The first meeting was attended by over 40 men, because it was a novelty, though a general thing in larger centres, where clubs meet once a week. The second meeting showed a distinct falling off, and enthusiasm died. And with it died what little initiative some may have had towards helping to keep the town in the limelight.

MONTHLY get together meetings are sorely needed in this town. There are many topics which might with profit be discussed, and careful consideration by a body of business men would surely result in more progressive measures being adopted individually and collectively. The Journal would be pleased to receive opinions of business men as to re-starting these monthly luncheons. If they were supported, arrangements might be made for speakers on topics of live interest to visit here and instill a little more enthusiasm and "pep" into those who see nothing but a day's work ahead. Life is what we make it, and there are many things all can do to make it brighter and more interesting.

THIS WAS IMPRESSED on the writer when listening to a number of young people entertain by song and music at a concert here last week. Some have been very apathetic or unsympathetic towards music being taught in the schools. Yet the thought struck home whilst listening to these young folks, how fine it is to see the progress they have made under competent teachers, and how much joy they bring to others in their ability to play and sing. It is these things which lift men's souls above the mere grubbing for a living, and music is to be enjoyed by the poor equally as well as the rich. Possessors of silver or golden voices are not restricted to any one class. The recent appearance here of a group of working people's boys from Wales demonstrated that fact.

SENTENCE STIMULANTS beneath the crudities of weakness and sin there is a soul that has no better medium for building moments when it truly longs for local business than The Journal. strength and righteousness. It goes into the homes.

When you want to reform your neighbor you may think you have religion; when you are forever dissatisfied with your own moral and spiritual growth you may be quite sure religion is beginning to get you.

There was "no room at the inn" for Christ. But he who opens his hand to give, his heart to hear heavenly melodies and his mind to accept the spirit of truth may find that the great guest has entered his life.

Behind the rough exterior of every man there is the struggle at times for beauty. Yea, even be-

## Do You Ever Wonder

Whether the "Pain" Remedy You Use is SAFE?

Ask Your Doctor and Find Out

Don't Entrust Your Own or Your Family's Well - Being to Unknown Preparations

THE person to ask whether the preparation you or your family are taking for the relief of headaches is SAFE is your doctor. Ask him particularly about "ASPIRIN."

He will tell you that before the discovery of "Aspirin" most remedies were aimed against the physician's best knowledge for the stomach and, often, for the heart. Which is food for thought if you seek quick relief.

Scientific rate "Aspirin" among the latest methods for discovered for the relief of headaches and the pain of rheumatism, neuritis and neuralgia. And the experience of millions of users has proved it safe for the average person to use regularly. In our own interest remember this.

"Aspirin" Tablets are made in Canada. "Aspirin" is a registered trademark of the Bayer Company, Limited. Look for the name Bayer in the form of a cross on every tablet.

### Important Engine Tests

Cunard White Star Superliner "Queen Mary" Subjected To Rigid Inspection

Preparations are being completed for the important engine tests to which the new Cunard White Star superliner "Queen Mary" will be subjected before she leaves the basin of John Brown's shipyard, Clydebank, Scotland.

The rigid task of inspection, under the joint supervision of company and shipyard experts, is expected to occupy several weeks, although preliminary surveys have already been carried out. The four 35-ton propellers have already been temporarily disconnected from their 227 foot long shaftings, and furnaces and boilers lighted, but every particle of the ship's machinery will undergo minute and severe tests in the yards before the actual speed trials, which will take place beyond the Heads of Arran, in the Firth of Clyde. Prior to proceeding on her speed trials the "Queen Mary" will leave Clydebanks about March 24 next and proceed to Southampton where she will enter the new Southampton drydock to be prepared for the trials some weeks later.

The speed trials of the "Queen Mary" will be conducted with the utmost secrecy. Not a single soul of the 560 carried aboard, except Sir Edgar Britten, the commander, will know just when the tests have actually begun or ended.

During the speed trials messages will be exchanged between the commander and the engine room in code instead of by telephone, giving details of the vessel's speed and behaviour. These messages will be recorded in cipher on perforated tape similar to quotations on a stock ticker.

For fear that the superliner may swamp yachts and houses on shore during these special manoeuvres, the speed trials of the "Queen Mary" will be carried out beyond the Heads of Arran in the Firth of Clyde instead of over the usual measured mile at Skelmorlie off the Ayrshire coast, or in Wemyss Bay.

The "Queen Mary" will speed over her trial course 25 times, anchoring at night off the Tail of the Bank. Later, on leaving the Clyde, three further trials will be carried out. Stern fenders will be secured to the ship's stem to ascertain the ship's speed while going hard astern will be made off Land's End when sailing to Southampton. Manoeuvring trials will then be carried out to find the area required and the time the liner will take to turn completely around.

Later there will be consumption trials in the Atlantic to discover the oil fuel consumption per 24-hour period.

### The Utmost In Efficiency

Firm in Moravia Has Great Idea To Save Time

Hands of a concern in Zlin, Moravia, and their secretaries are to have their "office" in an elevator.

Their office will be nearly 20 feet square, and the touch of a button will be enough to send it to which-ever floor of the tall building it may be needed.

There the doors will be opened, and the required business has been transacted. Then the staff will resume their "travel". The amount of time saved by taking the fully equipped office to where it is wanted, instead of having to take everything to each office, is estimated to be great.

PATTERN 5533

Even the butterly's enameled on his little charmer's newly crocheted frock—a style that's winsome and dainty for tots of 4 to 8. So easy to crochet, too, in a simple all-over pattern, topped by yoke of plain mesh which serves as sleeves and collar. Use white or colored string.

In pattern 5533 you will find directions for making the dress shown in sizes 4, 6 and 8; illustrations of it and of all stitches used; material requirements.

To obtain this pattern send 20 cents in stamps or coin (coin preferred) to Household Arts Dept., Winnipeg Newspaper Union, #75 McDermott Ave. E., Winnipeg.

There is no Alice Brooks pattern book published

## 4 to 5 TIMES

### MORE QUICKLY DIGESTED THAN COD LIVER OIL

Science has discovered why Scott's Emulsion of Cod Liver Oil is so much more beneficial than plain Cod Liver Oil. It is because it is easier to digest; they must be emulsified in the stomach. We emulsify the oil in our laboratories hence it is ready almost immediately for digestion and assimilation.

Senate To Co-operate

Hon. Arthur Meighen Says Both Parties Will Work For The Good of Canada

Conservative members of the senate, now in a majority in the upper house, will not employ their numbers to the embarrassment of the governmental minority, but will co-operate sincerely, diligently and without prejudice in reviewing legislation. This was the assurance given to Senator Raoul Danandrand, government house leader, by Rt. Hon. Arthur Meighen, Conservative leader, in the senate.

In the past five years the Liberal senators had worked earnestly and helpfully with their Conservative colleagues. The latter were now in a position where they could reciprocate and Senator Meighen assured Senator Danandrand that this assistance would be forthcoming.

He believed all members of the upper house appreciated the necessity of co-operating for the good of Canada and was confident the senate's deliberations would redound to the credit of parliament and the country.

Mr. Meighen's observations came at the close of a brief speech he delivered in the debate on the address in reply to the speech from the throne.

### Move Radio Station

Transport Station 70 Miles With Only Four Hours Interruption Of Service

The record-breaking feat of transporting an entire radio broadcasting station a distance of 70 miles in slightly under four hours' time "off the air" was reported to Edmonton headquarters of the Canadian Airways, Limited.

The job was completed by Pilot Archie McMullen and Ronald Ingrey, operator of the Canadian Airways commercial station at Fort Rae. The entire equipment was transported to the permanent camp of Major L. T. Burwash's mining properties at Yellowknife river, north shore of Great Slave lake.

For the past three years, Mr. Ingrey has kept the Fort Rae station in operation without a break. It is a 250-watt station and the movers hauled 40 and 50 below-zero weather in making the switch.

#### PEOPLE BEFORE PROPERTY

Golden text: No servant can serve two masters: for either he will hate the one, and love the other; or else he will hold to one, and despise the other. Ye cannot serve God and mammon. Luke 16:13.

Lesson 8. Devotional reading: Colossians 1: 18.

Explanations And Comments

The Gerasene. Luke 8: 26-39. A boat with Jesus and his disciples was beached one day on the eastern shore of the lake, which belonged to the Gerasenes, according to the Gospels. Jesus was once cast as naked demoniac whose abode was in the tombs. Such tombs were caves, either natural or hewn out of the rock, which were used as burial places. They were scattered about the cities, usually in lonely regions, and because they contained the bones of the dead were regarded as unclean. Some caves were places of evil spirit haunts.

The man fell down before Jesus, crying, "What have I to do with thee, Jesus, thou Son of the Most High God?" "The Most High God!"

"The Legion" was a name given to a violent paroxysm indicated by his having been bound with chains which he had broken to make his escape into the wilderness.

"To sweep off" torment me not" the man cried as Jesus bade "the unclean spirit" leave him. "What is their name?" Jesus asked. He sought to calm the man and gain his confidence and to make him realize his own identity.

"Legion" the man answered; "many demons were entered into me." Luke added. Then the demons, shouting, "We know not where Jesus sent us to command them to depart into Hades (the abyss), but to let them enter the herd of swine." "Cry out in the mountains, and say 'Depart' to me," Jesus uttered the word "Go!" or "Depart" according to Matthew's account.

The next thing that happened was that the swine, perceiving the terror of the master, and wild gestures of the maniac, rushed down the steep incline into the lake and were drowned. This may not have been the first herd of swine driven into the lake, but it was the most numerous persons, rightly believing with Whittier that "nothing can be in him which evil is in it," are troubled by this loss to the owners of the herd. It is known that the swine brought upon the man and to the whole country side by the cure of one so dangerous far away outweighed the loss to the owners.

The master of the swine fled to report their loss in the city and the country round about, whereupon the people flocked to the scene. They found the man sitting at the feet of Jesus, and his friends in the house. Seized with fear lest Jesus might destroy other property, they besought him to depart from them.

Jesus left in the boat for the opposite shore, but said to go with him, but Jesus told him to return to his own home and declare what great things God had done for him. The man obeyed and published the news everywhere.

A Lauder Story

Famous Scottish Entertainer Confused By Remark Of The King  
Sir Harry Lauder, the famous Scottish entertainer, sang for the king and queen at the Palace theatre in London one night and later visited them in the royal box.

After leaving their majesties, Lauder met a friend just outside the door and said to him: "Good night, George."

"Good night and good luck to you, Harry," hissed from behind. Turning, he saw the king had followed him out. "The monarch laughed heartily over Lauder's confusion.—Sault Ste. Marie Star."

## FLEMING'S FOLLY

BY  
LAWRENCE A. KEATING

### SYNOPSIS

The story opens with Link Fleming addressing a meeting of Boone County's eastmen, called together with the object of forming an irrigation company.

Roper Kilo, the boss of the Rawhides and nearby ranchers, who seemed to approve the plan but was really opposed to it, had found the company, a derelict mining engineer, whom Kilo might well have been called upon to sit his expert opinion in favor of the scheme, to reverse his earlier endorsement, and declare that irrigation in Boone county so far as Fleming's plan was concerned was only a new-fangled way to waste money.

The meeting adjourned. Link Hamilton and his sister, Helen, Link and Kilo stay behind and Helen asks Link concerning his irrigation project. This angers Buzz, who accuses Fleming of having ruined his sister and, as he asserts, ruin his "spread". Buzz shoots at Fleming in an uncontrollable fit of anger, but, fortunately, Link's foreman, is shot in the stomach, but remains uninjured. Buzz is arrested and sentenced to three years' imprisonment.

Link and Fleming form a partnership to provide irrigation for their own properties.

Fleming goes home and studies the plan drawn by Torney to learn whether they could be adapted to a smaller scheme suitable for a Helen's land, and is satisfied it could be done. Feeling cold, he lights the fire and there is an explosion that wrecks the house, burns it and the plans and renders Link unconscious. He is rescued by the blaze by an employee.

(Now Go On With The Story)

### CHAPTER VII. Continued

They turned to see a short man in a fur-collared overcoat pausing in the doorway. At recognition that she was a girl he quickly doffed his derby hat. The man was apple-faced with a long pointed nose and a sharp chin. He bowed gravely and came forward.

"You're Mr. Fleming, I guess? My name's G. I. V. Berrens. Traveling representative of the Western Improvement Company of Denver. I—er, heard about a project Mr. Fleming is interested in, and decided to come out to speak to him. I must have been on the way when this—er, regrettable incident occurred." He stood beside the recumbent rancher. "Mighty sorry, mighty sorry," he stated in a low, peculiarly husky voice. "Mighty sorry indeed."

Link could not recall having seen the man before. Berrens drew up a stool and offered it to Helen. Then tossing his derby on the stand where the oil lamp was, he thrust back the long overcoat, apparently joining his fat little hands behind him. Rocking back and forth, heel-and-toe, he smiled again and shook his head.

"Er—I am not selling anything but ideas, possibly—one might say ideas, Mr. Fleming. So don't worry about that. Fact is, in your—ah—unfortunate condition of the moment you may, perchance be particularly amenable to my proposition."

Link's glance showed plain longing for the fellow to go away. It had no visible effect on Mr. Berrens, however. Nodding and smiling from one to the other of them, and back again, he continued what sounded like a planned speech.

"But we can't get in any work now till Spring. That means the cost goes up. And Helen, I'd like to get you out of this. Maybe we'll both be better off."

"Then you don't think we could build a dam?"

"I reckon so."

"Right!" At the Trailed Hotel in Rawhide I chance to fall into conversation with one or two townsmen. Mr. Otto Pleper, president of the bank, for one. Ah—gather that you and this young lady have discussed some irrigation project in common— together—which, one might say, is not thought highly of by other ranchers?"

"That's true, Mr. Berrens."

The fussy little man exhibited a row of gold teeth. "Sir, the company I represent, the Western Improvement Company, is a powerful, well-financed concern. We are, as a matter of fact, interested in securing a small, interesting place where we can experiment. I am not trying to sell you anything, sir, except possibly an idea."

"Don't think I can afford even an idea now, Mr. Berrens. My ranch house—"

"Exactly!" Mr. Berrens beamed. His gold teeth gleamed. "This carbonizing of your ranch house—is, I assume, a severe blow to a man of your apparent financial standing. Nothing saved, eh? Mr. Fleming, you are a sick man, sir. Tch! That such a thing should happen in this day and age!"

"A gentleman named Soak Torney was slain, I am told. Also, someone at the same time tried to kill you. This—er, fire seems to be of

incendiary origin, do you think? At least, some incendiary seems to have placed dynamite in your stove."

"What I am getting at," he ended with dramatic suddenness and appropriate gestures, "is this: my company will purchase your ranch, sir. We don't want it for the cattle. We want it because Silver Creek provides an interesting opportunity to try irrigation and to study the results."

"But we intend—" Helen began. "With men trying to kill you at every turn? Mr. Fleming, why not accept a fair price and leave the country?"

The bunkhouse became silent save for the muffled talk outside and the impatient stamp of horses' hoofs. Link scowled as he looked from Berrens to the girl, then into space. Disengagement welled in him at realization that all Boone County wanted was the irrigation scheme fall—actually hoped it would fall. Some one wanted the extent of attempting to kill him. The loss of the plans, the destruction of his ranch house—all this was warning enough. Could a man succeed in the face of such odds?

Thought of surrender was not a pleasing one. Link Fleming could not recall when he had surrendered before.

Nevertheless there was a difference between being courageous and foolhardy. He could sell out and go elsewhere, easily enough.

He gazed thoughtfully at Helen Hamilton, reated nearby, her graceful profile turned his way. Perhaps he would do her a service to scotch this scheme here and now. To persist, plainly, meant trouble. His pulse sped and new warmth went through him. He wanted to avoid making trouble for her, trouble of any kind . . .

"How much for the Star Loop, Mr. Berrens?"

He knew it might be worth while you have. I've been informed as to your land, however. I'll pay five thousand for the land and the buildings, and your beef at the market price. That's just a rough idea, but we can work it out on a satisfactory basis. I'm sure."

"How about seventeen hundred acres of land that'll grow alfalfa when it's watered?"

"Ha! As it isn't watered now, it isn't worth much. Fifty cents an acre. Mr. Fleming, and that's a very generous offer. Very generous, indeed!"

He thought a moment. With his steers and equipment the price would run around ten thousand dollars. It was less than the place was worth, but that amount in cash meant settling all this. And the more he pondered, the more deeply convinced he was. "Well, I'm not sure what stock to sell. Helen would be spared heightening the friction between herself and Buzz, in prison—between himself and Kilo, who must have some grounds for expecting to win the girl . . .

Suddenly his mind was made up. "Mr. Berrens, I'll take—"

"Wait!" The girl rose sharply. Her eyes were bright and her face pale. "You shan't do it!" she exclaimed indignantly. "Why, what makes you talk so?"

"Then you don't think we could build a dam?"

"I reckon so."

"Right!" At the Trailed Hotel in Rawhide I chance to fall into conversation with one or two townsmen. Mr. Otto Pleper, president of the bank, for one. Ah—gather that you and this young lady have discussed some irrigation project in common— together—which, one might say, is not thought highly of by other ranchers?"

"That's true, Mr. Berrens."

The fussy little man exhibited a row of gold teeth. "Sir, the company I represent, the Western Improvement Company, is a powerful, well-financed concern. We are, as a matter of fact, interested in securing a small, interesting place where we can experiment. I am not trying to sell you anything, sir, except possibly an idea."

"Don't think I can afford even an idea now, Mr. Berrens. My ranch house—"

"Exactly!" Mr. Berrens beamed. His gold teeth gleamed. "This carbonizing of your ranch house—is, I assume, a severe blow to a man of your apparent financial standing. Nothing saved, eh? Mr. Fleming, you are a sick man, sir. Tch! That such a thing should happen in this day and age!"

"A gentleman named Soak Torney was slain, I am told. Also, someone at the same time tried to kill you. This—er, fire seems to be of

## Mr. CAFFEINE-NERVES gets thrown out

WHILE many people can safely drink tea and coffee, there are thousands and thousands who cannot. Maybe you are one without realizing it.

If, for instance, you suspect that the drug caffeine found in both tea and coffee is undermining your nerves, your digestion, switch to POSTUM for 30 days and see how much better you feel. There is nothing in POSTUM that can possibly harm you.

**FREE!**—Let us send you your first week's supply of POSTUM free. Write for it to Consumer Service Department, General Foods, Limited, Cobourg, Ontario.

### Tribal Sacrifice Dropped

Indian Medicine Man Could Not Find

Pure White Dog

A bitter wind moaned mournfully in the caves of Cayuga and Seneca tribal longhouses on the Six Nations Indian reserve near Simcoe, Ontario, as the braves concluded the "feast of the white dog" with ceremonial dances and incantations.

Thermometers registered slightly below zero in keeping with the tradition the festival be observed on the coldest night of the year.

Custom demanded a pure white dog, "without blemish or spot," be sacrificed but the Cayuga and Seneca medicine men could not find such a animal and dispensed with part of the ceremony.

Tribal chieftains, however, led the traditional dances and offering of thanks to the "great spirit" for watching over the tribes during the year.

### Will Preserve Voices

Radio Broadcasting Commission Has

Archive Of Speeches

Neucleus of a museum of sounds, preserving the voices of great figures and audible records of events that cannot be re-enacted, has been formed by the Canadian Radio Broadcasting Commission.

The archives of speeches and other sounds far contain six addresses of the late King George and a record made at the first birthday party of the Dionne quintuplets.

For further information, write to the Dionne quintuplets.

### Fire-Retarding Wood

Chemically Treated With Compound

Wood Will Not Burn

Coincident with the statement of United States builders and insurance men that the United States fire losses for 1935 amounted to \$245,000,000, comes a report from the National Board of Fire Underwriters indicating an assurance that there is such a thing as fire-retardant wood.

The wood tested by the Board had no red oak and maple which had been thoroughly and uniformly impregnated in pressure tanks containing ammonium salts, a fireproofing compound which, it is not perhaps generally known, has actually been procurable in Canada for at least two years. The treated wood is almost the same in appearance as ordinary wood but is a little heavier because of the salt content. It is easily fooled and takes varnish well.

The investigators of the Board tested the treated wood under conditions that sent untreated walls and floors roaring up in flames while the treated wood did not burn at all but after a long period of exposure to the fierce heat was deeply charred. Not once, however, did the treated wood flame or aid the spread of combustion. The National Board of Fire Underwriters' final verdict was that the wood was non-inflammable.

The investigators of the Board tested the treated wood under conditions that sent untreated walls and floors roaring up in flames while the treated wood did not burn at all but after a long period of exposure to the fierce heat was deeply charred. Not once, however, did the treated wood flame or aid the spread of combustion. The National Board of Fire Underwriters' final verdict was that the wood was non-inflammable.

The total value of animals on 17,019 farms in Canada at the end of 1934 was \$8,427,567, an increase of nearly a million dollars over the preceding year.

### Little Helps For This Week

#### Fulfilled Last Request

ashes of Engineer Scattered On Track In B.C.

Fulfilling a last request, the ashes of Anthony Livene Silvane, who for 39 years drove an engine on the Esquimalt and Nanaimo Railway, operated on Vancouver Island by the Canadian Pacific, were cast along the track he knew and loved so well. Engineer A. C. Wilson, friend of the late "Tony" Silvane and chairman of the Brotherhood of Locomotive Engineers performed the last rites in the company of officials and railmen near Silvane station at the summit of the spectacular Malahat Pass, 18 miles north of Victoria, B.C.

Panama has started a drive for modern hotels for tourists.

### Real Rainbow Plant

At German Garden Shows Four Different Colors

A "rainbow" plant has been found in a Hamburg garden. It is an aster in which four different colors are shown by flowers on the same stem. One blossom is white with a yellow centre. The other is a mixture of blue and red. Botanists explain that this is due to an irregular division of cells in the plant's structure.

**Horse Scored A Point**

The motor age received a rebuff at a sale of confiscated vehicles in Orangeburg, South Carolina. Two automobiles, in fair condition, sold for a total of \$19. Then a horse and wagon were offered. Bidding grew spirited. They finally were sold. The sale price was \$119.

"So you are building a new house, eh? How are you getting along with it?"

"Fine. I've got the roof and the mortgage on it, and I expect to have the furnace and the sheriff in before fall."

"Fine insects are capable of seeing farther than six feet."

Every age, unthinkingly, mothers take the advice of unqualified persons instead of their doctors—on remedies for children.

If they knew what the scientists know, they would never take this chance.

**Doctors Say PHILLIPS' For Your Child**

When it comes to the frequently-used "milk of magnesia," doctors, for over 30 years, have said "PHILLIPS' Milk of Magnesia" — the safe remedy for your child.

Remember this — And Always Say "Phillips'" When You Buy. Your child deserves it; for your own peace of mind see the safe — genuine Phillips' Milk of Magnesia.

### Local News

Advertisements of progressive stores in The Journal beget confidence and goodwill on the part of buyers.

Getting your ears badly frozen is a painful experience, as S. W. Chayley found during a visit to Calgary. He walked the length of six city blocks and so badly frozen were his ears that he required medical attention to reduce the swelling.

Jack McDonald, proprietor of the Empre Hotel, does not relish early rising. On Tuesday morning the water service at the hotel was frozen, and he had to scamper around to get the thawing machine into action at 5 a.m. in order to secure water for the boarders' breakfasts. During the cold weather two shifts of men have been at work thawing frozen connections.

**Death Came Without Warning**  
(Continued from Page 1)

**FUNERAL ON THURSDAY**  
The funeral service was held on Thursday morning, Requiem High Mass being sung at Holy Ghost church, Rev. J. T. Dunbar conducting the service. Many floral tributes covered the casket, and interment was made in the Roman Catholic cemetery.

The pall-bearers, old friends and neighbors of the deceased, were A. Dewar, Sid Short, A. S. McLintock, M. Stigler, Havelock Hubert and J. A. McDonald.

**Burglars Busy at Local Stores**  
(Continued from Page One)  
was stolen during the noon hour from Distributor's warehouse. On Saturday afternoon Mrs. Ferguson's store was robbed of a sum of money.

The Polish Society will hold their annual benefit dance in the Polish hall in East Coleman on Sat. Feb. 22, in aid of S. Gembalow, who has been incapacitated from active work for a considerable time. This is for a worthy cause. Tickets 50c and 25c.

**Ledieu Wins Studebaker Cup**  
Ledieu's rink was successful in winning the Studebaker cup at the bonspiel held at Blairmore on Wednesday and Thursday, when they withstood the challenge of the Boulton rink in the final. This is the fourth successive year Coleman has retained this trophy. Coleman rinks competing were: Ledieu, Boulton and Destabel.

**POSITION FOR ADVANCEMENT—**  
Open to reliable man with sales ability and willing to give time and study with view to providing steady income. Preference given to married man with car. Reply stating age, family and other qualifications to Box E. 42-2.

### Stores Endangered by Fire Caused Anxiety

Thawing Out Frozen Water Pipes Leads to Near Disaster on

**Friday Last**

Water pipes becoming frozen beneath the Elite Confectionery, owned by Mr. and Mrs. John Bell, a gasoline blow torch was used to thaw them. The woodwork adjacent to the pipes became ignited, and was first noticed by Frank G. Graham, sitting in his barber shop.

At 1 p.m. he noticed a crackling sound, and rapid investigation revealed that the wooden wall between his store and Bell's was alight. Quickly summoning help from his son Frank in the post office, he chopped a hole in the wall and inserted a stream of water from a basement hose. The fire brigade quickly arrived, and by this time the fire looked very menacing in 20 below zero weather.

Fears were felt for the stores in the entire block, as a strong wind from the east would have swept that side of the street had the fire got beyond control, taking with it the Cameron block, in which are living several families.

A heavy stream of water quickly quelled the blaze, though considerable damage was done to the Bells' living quarters, and to Dr. Campbell's dental office in the same building.

Everyone breathed a sigh of relief when it was found the danger was over, though for some minutes it caused a great deal of anxiety.

ADVERTISEMENTS of Leading Merchants will be found in this paper.
